

FREEDOM II BATHING SYSTEM

The TradeWind Freedom II Transfer system features an extra wide outward opening door that allows for easy transfer from a wheelchair to the bathing seat with minimal effort. For those needing lift assist, the removable front floor panel lets the lift legs to disappear under the unit allowing for the bather to be placed comfortably onto the seat. Either way, this unit provides for greater bathing freedom for those with special needs.

The Freedom II is 60" x 32" and will fit the space of a conventional bath. Two end panels permit use as a freestanding system. Whether you are wanting to replace an existing bath, or convert an unused room into a bathing suite, this system is perfect. Like all TradeWind models, the Freedom II is proudly made in the U.S.A.

Standard features include twin grab bars, locking door mechanism, lever handle cable drive waste and overflow. The lifetime warranted door seal has a mechanical locking feature that ensures for a watertight seal.

HYDRO-MASSAGE WHIRLPOOL SYSTEM With Consta-Heat

TradeWind incorporates true Hydro-Massage Bath technology in the New Freedom Series Bathing System. You can obtain a full body massage while relaxing and letting the cares of the day slip away. The 10 jet system has 4 fully adjustable body jets, 4 fully adjustable oscillating micro-massage back jets, and 2 non adjustable calf jets for maximum hydro-massage therapy.

The system is activated by simply pressing the raised pneumatic buttons (standard - pictured above) or by pressing the buttons of the optional Easy-Touch Electronic Control Keypad.

The Consta-Heat inline electric heater (standard with the Hydro-Massage package) will maintain your bath temperature throughout the bathing experience.

Sit back, relax, and enjoy.

Available options include Hydro-Massage whirlpool system with Consta-Heat inline heater, Easy Touch Electronic Controls, Thermal-Air Massage air bath system with heated air supply, and Thermostatic anti-scald faucet with built-in flow control and diverter valve for handheld sprayer. The faucet is controlled with the single lever handle flow control and diverter which is ergonomically designed with the special needs bather in mind.

Shown with optional Thermostatic Faucet.

THERMAL-AIR MASSAGE™

To enhance your bathing pleasure in a different way, you can enjoy the soothing sensation of thousands of tiny bubbles surrounding your body from our 16 air injectors strategically placed to give you maximum enjoyment. The three-speed blower allows you to choose a comfortable level of massage.

To maximize your enjoyment, add both systems to your Freedom Bathing System. You now have the best of both worlds. A full adjustable Hydro-Massage bath and the caressing sensation of the Thermal-Air Massage. In addition, there are performance and aesthetic enhancing options available to make your bath even more exhilarating and enjoyable.

ACCESSORIES & OPTIONS

Enhance your bathing experience with restful sights, smells and therapies...

THERMOSTATIC FAUCET

Thermostatic (Anti-Scald) Faucet with Handheld shower is ergonomically designed with a lever handle and thermostatic control for optimum safety. The faucet handle operates the diverter/flow control cartridge to deliver precise tempered water. The faucet assembly is factory installed and tested. The trim kit will be field attached by the installer. Available in Polished Chrome only.

CABLE DRIVE DRAIN

White Cable Drive Waste & Overflow with the ADA handle allows for quick draining of the tub with the flip of the lever.

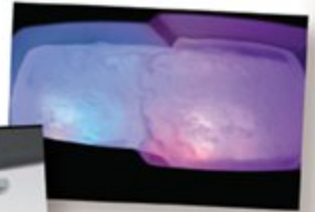

THE "OZONATOR"

Using the latest in Ozone technology, the "Ozonator" continuously cleans and disinfects the water as it recirculates throughout the system, providing you with clean, fresh water as you enjoy your time in your Tradewind whirlpool tub.

CHROMOTHERAPY

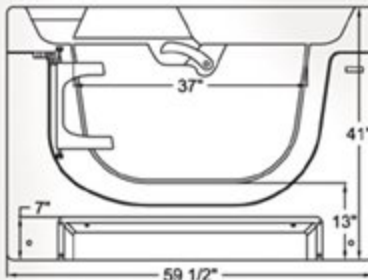

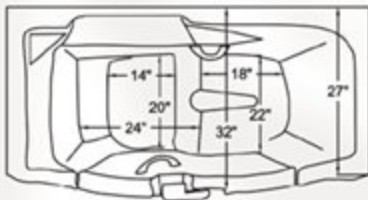

Choose a color that suits your mood. Soothing colors, like soothing aromas, add a sensual dimension to your bathing experience. Choose from six relaxing shades and enjoy!

The Freedom II Transfer system is designed as a free standing or built-in appliance. When utilized as a free standing unit, the factory installed end panels give the unit a totally finished look.

The panels may be removed for an alcove installation.

The 60" x 32" measurements will fill the space of an existing bath.
